Florida Rules and Laws

Objectives

- Learn the requirements for Florida respiratory therapists, including the mandatory Laws and Rules requirement.
- Understand the renewal process for the Florida respiratory care license including continuing education requirement and fees.
- Learn the laws of the Florida Board of Respiratory Care and the Florida Department of Health pertaining to licensed respiratory therapists.
- Become familiar with the disciplinary grounds and actions including violations and recommended range of penalties.

In order for the Florida Respiratory Therapist to be eligible for licensure by the board, an applicant must be an active “certified respiratory therapist” or an active “registered respiratory therapist” as designated by the National Board for Respiratory Care, or its successor.

When renewal of the Respiratory Therapy license is being planned, requirements are as follows:
To ensure you receive your renewal notification from the department, your current mailing address must be on file. Failure to renew an active or inactive license by the expiration date will result in the license being placed in delinquent status. Failure by a delinquent licensee to renew before the expiration of the current licensure cycle renders the license null and void without any further action by the board or the department.

Licensees requesting to reactivate their license from inactive or retired status are required to pay additional fees and comply with specific continuing education requirements. Please contact the board office at info@floridasrespiratorycare.gov to request your reactivation requirements.

Military Exemption: To receive an exemption from the renewal requirements, please provide a copy of your orders which provides the beginning and end date of your current enlistment or a copy of your spouse’s orders. If you are a Commissioned Officer, you may provide a letter from your commanding officer that reflects the length of your contract with a beginning and end date to fulfill this requirement.

By submitting the appropriate renewal fees to the department, a licensee acknowledges compliance with all requirements for renewal, including continuing education.

A licensee who remains on inactive status for more than two consecutive biennial licensure cycles and who wishes to reactivate the license may be required to demonstrate competency to resume active practice by sitting for a special purpose examination or by completing other reactivation requirements.

You may renew online if you have a credit or debit card to complete the transaction. Please note that you can now renew online, print a copy of your application summary and mail it with your cashier's check or money order to: Division of Medical Quality Assurance, P.O. Box 6320, Tallahassee, FL 32314-6320. If you are renewing your license after the expiration date and your status still indicates Clear/Active, you will be assessed a delinquency fee. The delinquency fee will be in addition to your renewal fees.

If your license was Delinquent/Active before the renewal deadline, it will be moved to Null and Void status after the renewal deadline. You should contact your board office for further instruction.

The process of renewing a license and receiving a printed license in the mail may take 7-10 business days. Initiating contact to confirm the receipt of fees or the status of your license prior to this time will not expedite the renewal process.

Purpose and Intent:

The purpose in enacting this part is to provide for the licensure of persons who deliver respiratory care services and who meet certain requirements. The delivery of respiratory care services by persons licensed pursuant to this part shall not be construed to permit the practice of medicine.

It is the finding of the Legislature that the delivery of respiratory care services by unskilled and incompetent persons presents a danger to the public health and safety. Because it is difficult for the public to make informed choices related to respiratory care services and since the consequences of wrong choices can seriously endanger public health and safety, it is the intent of the Legislature to prohibit the delivery of respiratory care services by persons who are determined to possess less than minimum competencies or who otherwise present a danger to the public.

It is the intent of the Legislature that the department regulates blood gas laboratories and that the supervision of healthcare practitioners performing blood gas analysis and specimen collection for the purpose of such analysis be specified in rules pursuant to the applicable practice act. Further, it is the intent of the Legislature that personnel licensed pursuant to this part shall be exempt from the licensure provisions of chapter 483 (Health Testing Services). (Title XXXII, Chapter 468, Part V, Respiratory Therapy 468.351)

Board of Respiratory Care Powers and Duties:

The board is authorized to establish minimum standards for the delivery of respiratory care services and to adopt those rules necessary. The board may administer oaths, summon witnesses, and take testimony in all matters relating to its duties. The board may adopt rules to administer this part, including rules governing the investigation, inspection, and review of schools and colleges that offer courses in respiratory care in order to ascertain their compliance with standards established by the board or appropriate accrediting agencies. (468.353)

Board of Respiratory Care Organization and Function:

The Governor shall, insofar as possible, appoint persons from different geographical areas.

To achieve staggering of terms, the Governor shall appoint the board members as follows:

1. Two members shall be appointed for terms of 2 years.
2. Two members shall be appointed for terms of 3 years.
3. Three members shall be appointed for terms of 4 years.

The board shall annually elect from among its members a chair and vice chair.

The board shall meet at least twice a year and shall hold additional meetings as are deemed necessary.

Four members of the council constitute a quorum.

Unless otherwise provided by law, a board member shall be compensated \$50 for each day he or she attends an official board meeting and for each day he or she participates in any other board business. A board member shall also be entitled to reimbursement for expenses. Travel out of the state shall require the prior approval of the State Surgeon General.

Licensure by this mechanism requires verification by oath and submission of evidence satisfactory to the board that such credential is held.

Licensure as a registered respiratory therapist shall be granted by endorsement to an individual who holds the "Registered Respiratory Therapist" credential issued by the National Board for Respiratory Care or an equivalent credential acceptable to the board. Licensure by this mechanism requires verification by oath and submission of evidence satisfactory to the board that such credential is held.

An individual who has been granted licensure, certification, registration, or other authority, by whatever name known, to deliver respiratory care services in another state or country may petition the board for consideration for licensure in this state and, upon verification by oath and submission of evidence of licensure, certification, registration, or other authority acceptable to the board, may be granted licensure by endorsement.

approved by the board. The board shall approve continuing education courses which may be accepted in meeting the requirements of this part. Providers of such courses shall also be approved by the board. The board may make exceptions from the requirements of this section in emergency or hardship cases. (468.361)

Such reports or records include only those reports or records which require the signature of a respiratory care practitioner or respiratory therapist.

Circulating false, misleading, or deceptive advertising.

Unprofessional conduct, which includes, but is not limited to, any departure from, or failure to conform to, acceptable standards related to the delivery of respiratory care services, as set forth by the board in rules adopted.

A patient is presumed to be incapable of giving free, full, and informed consent to sexual activity with the patient's respiratory care practitioner or respiratory therapist.
